- Nearest station: KEIO line Seisekisakuragaoka station, 20 min by bus
- TOEIC: 700 points

## PR

I was interested in technology such as computers since I was a student. The first owned PC was original assembled by me, collecting parts little by little. I often being asked for troubleshooting computers, software and smartphones how to etc, I am very happy to see the partner 's pleasure when I solve the problem, I feel challenging.  
At your company, I would like to take full advantage of my experience so far and I would like to give IT support that is polite and easy to understand in English.
